## Student Achievement:

To increase student achievement as measured at grade spans by specific building goals.

## College and Career Readiness:

To cultivate the attributes that students will need to adapt to a rapidly changing global society and to foster socially responsible citizens who will positively impact our changing global society.

## Technology:

To create a comprehensive long-term technology program inclusive of hardware, software, infrastructure, staffing, and training, which is applied and ingrained into each curriculum area, while maintaining fiscal responsibility.
