David C. Mango  
Superintendent

Dear Kinnelon Colts Community and Staff Members,

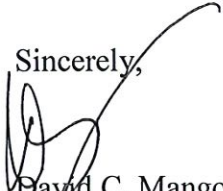

As follow-up to yesterday communication and additional air quality testing regarding Stonybrook School, preliminary surface testing results from RK Environmental indicated apparent mold growth (AMG) in the following room(s): 103, 110, 117, 315, 317, 321, 324, and 328. In room 106, an odor was also present, but no surface mold was found. While we await all final air quality and, surface testing results, rest assured that under the guidance of RK Environmental, the district is remediating these areas and taking steps forward in eliminating future concerns.

In my communication yesterday, I shared that purchasing air scrubbers would be a major step in assuring future outcomes. That said, Kinnelon community resident, parent, and, Superintendent of Schools in neighboring Bloomingdale, Dr. Nicosia, reached out and offered his district air scrubbers. Our buildings and grounds office is in the process of transporting those air scrubbers to Stonybrook School to assist in the remediation process. We cannot thank Dr. Nicosia and the Bloomingdale Board of Education enough for their assistance during this time of need.

Going forward, all final air quality and surface testing results will be on the main page of the district website once received. Please know that the health and safety of our entire school community remains at the forefront of our priorities.

Thank you once again for your patience, cooperation, and understanding.

Sincerely,

  
David C. Mango  
Superintendent of Schools
