David C. Mango  
Superintendent

August 25, 2023

Dear Kinnelon Colts Community and Staff Members,

This communication serves as notification and follow-up with regard to air quality and surface testing at the Stonybrook School. In our continued partnership with RK Environmental the most recent gel surface testing results indicate moderate growth in the following classrooms: 308, 313, 314/316, and 315/317. Air quality testing indicates either low, normal or trace results. All air quality and gel surface testing results can be found on the district website.

Rest assured that under the guidance of RK Environmental, the district has and will continue to remediate all areas of Stonybrook School and take proactive steps in eliminating future concerns. The district is also in the process of partnering with RK Environmental in drafting a contract to include continued air quality and surface training of all custodial and maintenance staff, as well as, health and safety coursework to be taken for instructional and informational purposes'.

As always, the health and safety of our entire school community is my offices' top priority.

Thank you once again for your patience, cooperation, and understanding.

Sincerely,

David C. Mango  
Superintendent of Schools
